PROFESSIONAL SUMMARY

Computer Science undergraduate (2022-2026) with strong foundation in Data Structures, OOP, and Backend Development. Hands-on experience building secure CRUD-based web applications and machine learning systems including Loan Approval Prediction and Recommendation Engines. Completed internships in Web Development with practical exposure to database-driven applications, secure coding, and real-world deployment workflows. Also experienced in Data Entry and MS Office tools with high accuracy and attention to detail. Seeking Software Development or Data-related roles to contribute technical and analytical skills.

EDUCATION

B.Tech - Computer Science & Engineering

Ramgarh Engineering College

2022 - 2026 (Expected Graduation)

Intermediate (Science)

Sindri College

2020 - 2022

TECHNICAL SKILLS

Programming

Python, Java, C, C++

Web Development

HTML, CSS, JavaScript, PHP

Backend & Database

MySQL, CRUD Operations, Database Connectivity

Machine Learning

Scikit-learn, Pandas, NumPy, Data Preprocessing

Data & Office Tools

MS Excel, MS Word, MS Office, Data Entry (High Accuracy & Fast Typing)

Core Concepts

Data Structures, OOP, DBMS, Problem Solving

Tools

Git, GitHub, VS Code

Languages

Hindi, English

INTERNSHIP EXPERIENCE

Web Development Intern

InternPe | Nov 2025 - Dec 2025

- Developed dynamic web applications using PHP & MySQL
- Integrated frontend and backend components
- Implemented CRUD operations with database connectivity
- Demonstrated strong professional discipline and timely project completion

Web Developer Intern

Apex Planet Software Pvt. Ltd. | June 2025 - Aug 2025

- Built database-driven applications using PHP & MySQL
 - Implemented secure CRUD operations with input validation
 - Used prepared statements to prevent SQL injection
 - Improved backend logic and optimized SQL queries
-

PROJECTS

Loan Approval Prediction System

Python, Scikit-learn, Pandas

- Built ML classification model to predict loan approval status
 - Performed data cleaning, feature encoding & preprocessing
 - Optimized model using evaluation metrics and hyperparameter tuning
 - Designed modular pipeline for scalability
-

Recommendation System

Python, Scikit-learn

- Implemented collaborative filtering approach
 - Built user-item matrix & applied cosine similarity
 - Generated Top-N personalized recommendations
 - Improved relevance through preprocessing techniques
-

Plant Disease Detection System

Python, CNN, TensorFlow

- Developed image classification model using CNN
 - Preprocessed dataset (resizing, normalization)
 - Achieved strong validation accuracy
 - Integrated trained model for real-time prediction
-

Secure CRUD Web Application

PHP, MySQL

- Developed authentication-based secure CRUD system
 - Implemented prepared statements for SQL injection prevention
 - Added role-based access control
 - Designed structured backend architecture
-

STRENGTHS

- Analytical & logical thinker
- Fast learner
- Detail-oriented (Data accuracy focus)
- Strong communication & teamwork
