

SAURAV KUMAR NONIA

Python Developer | Backend Developer | Generative AI Engineer

Dhanbad, Jharkhand, India | +91 9931368744 | sauravkumarnonia@gmail.com LinkedIn: linkedin.com/in/sauravkumar86 | GitHub: github.com/saurav827

PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science graduate (2026) with a strong foundation in Python backend development, Machine Learning, and Generative AI engineering. Experienced in designing and shipping end-to-end AI applications — from NLP classification pipelines to LangChain-based RAG systems and multi-agent orchestration frameworks — as well as backend systems using FastAPI, PostgreSQL, and REST APIs. Completed two web development internships delivering database-driven applications with secure, structured backend logic. Combines analytical rigor with practical engineering skills in prompt engineering, vector search, and workflow automation. Actively seeking full-time opportunities as a Python Developer, Backend Developer, or Generative AI Engineer where I can apply my AI/ML and backend expertise to build scalable, real-world products.

TECHNICAL SKILLS

Programming Languages: Python, SQL, PHP, Java, C, C++

Backend & API Development: FastAPI, REST API Design, CRUD Operations, Authentication, PostgreSQL, MySQL

Generative AI / ML: Machine Learning, NLP, LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, LLM Integration, Multi-Agent Systems

Tools & DevOps: Docker, Git, GitHub, Streamlit, VS Code

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Problem Solving

INTERNSHIP EXPERIENCE

Web Development Intern | InternPe

Nov 2025 – Dec 2025

- Engineered dynamic web application features across 5+ modules using PHP, MySQL, HTML, and CSS, improving overall interactivity.
- Automated CRUD workflows connecting frontend forms to backend database operations, cutting manual data-entry steps by ~30%.
- Collaborated with a cross-functional team to debug and deploy features, reducing reported bugs by ~20% before handoff.
- Strengthened practical understanding of deployment-oriented, production-style web development.

Web Development Intern | Apex Planet Software Pvt. Ltd.

Jun 2025 – Aug 2025

- Built 4+ database-driven web application features using PHP and MySQL with structured backend logic.
- Implemented secure input validation and CRUD operations, mitigating SQL injection risk across all forms.
- Applied validation and structured coding practices to improve application reliability and maintainability.
- Resolved 15+ functional issues during testing cycles, gaining hands-on exposure to real-world debugging workflows.

PROJECTS

AI-Powered Fake News Detection Platform | Python, Scikit-learn, NLP, TF-IDF, Streamlit

- Built an NLP classification pipeline achieving ~94% accuracy on 10,000+ news samples using TF-IDF and Logistic Regression.
- Designed a real-time Streamlit interface enabling instant fake-vs-real prediction with confidence scoring.
- Reduced manual fact-checking effort by automating text preprocessing and feature extraction.

AI Resume Analyzer & Interview Coach | Python, NLP, LLM APIs, Streamlit

- Developed an AI tool that scores resumes against job descriptions and generates ATS-compatibility feedback in seconds.
- Built a mock-interview module generating role-specific questions using prompt engineering, improving candidate readiness.
- Parsed and analyzed 50+ resume samples to fine-tune scoring logic for accuracy and relevance.

RAG Document Chatbot | Python, LangChain, RAG, Vector Embeddings, FastAPI

- Built a Retrieval-Augmented Generation chatbot enabling natural-language Q&A over uploaded documents, achieving ~90% relevant-answer rate.
- Implemented a vector embedding storage and semantic search pipeline using LangChain for context retrieval.
- Exposed chatbot functionality via FastAPI REST endpoints for scalable integration into other applications.

JarvisX – Personal AI Assistant | Python, Prompt Engineering, Workflow Automation

- Designed a modular local AI assistant with owner-session lock, privacy-first behavior, and safe-action restrictions.
- Automated 10+ everyday productivity tasks through structured, reusable prompt workflows.
- Improved assistant reliability by implementing guided, restriction-based task execution logic.

Multi-Agent Research Assistant | *Python, LangChain, Multi-Agent Orchestration*

- Architected a multi-agent system where 3+ specialized agents collaborate to research, summarize, and compile findings automatically.
- Reduced manual research time by orchestrating parallel agent tasks (search, summarization, compilation).
- Integrated the LangChain agent framework for tool-calling and task delegation across multiple agent roles.

EDUCATION

B.Tech in Computer Science & Engineering | *Ramgarh Engineering College* 2022 – 2026

Intermediate (Science) | *Sindri College* 2020 – 2022

CERTIFICATIONS

- Internship Completion Certificate — Web Development, InternPe (CID: IPI#71774), Dec 2025
- Certificate of Completion — Web Developer in PHP & MySQL, ApexPlanet Software Pvt. Ltd. (ID: APSPL2510325), Aug 2025
